The large living-dining room and open kitchen are located on the 1st floor. This floor also consists of an additional bedroom, separate bathroom and separate toilet. Upon entering the villa, you see a spacious open hall with an impressive marble staircase that connects both floors. Under the stairs is a large cupboard where you can put/store your suitcases. Around the villa, there is plenty of room to sit or lie in the sun or in the shade. The large pool, 4,5 x 9 meters, includes a round section with built-in seating for large groups. There is LED lighting at night creating a really special luxurious atmosphere. The pool has a modern electrolysis system, therefore it is filled with slightly salt water. The water is disinfectant, feels soft and is gentle to skin and eyes, as well as much healthier than a chlorinated pool. While a salt electrolysis swimming pool contains only 4 grams salt / liter, seawater contains 35-40 grams of salt / liter. It is also possible to dine outside. There are enough dining tables, a Weber charcoal BBQ, large fridge, and summer kitchen with sink and running water on the bottom floor near the pool. A large pergola between the house and the pool provides shade. You will also find a complete bathroom and a washing machine on this bottom floor.
